Application Jukebox Training for System Administrators, Integrators, and Architects

Application Jukebox: Install and Configure

This hands-on or online training course explores the installation, configuration, and administration of the Application Jukebox deployment, which consists of the Application Jukebox Server, Application Jukebox Agent and the Application Jukebox Packaging Studio. Upon completion of the course, students will have obtained the knowledge to successfully install, configure and manage their businesses Application Jukebox deployment. To view the course description, please locate the Course Description Catalog.

Application Jukebox: Deploy and support

This hands-on or online training course, which is targeted at experienced system and application infrastructure administrators, covers the deployment process using available tools and utilities within Application Jukebox, Active Directory deployment and configuration and the support of the Application Jukebox infrastructure. The course conveys skills for the management and support of the Application Jukebox solution. Troubleshooting tips and supports resources are presented throughout the course. Upon completion of the course, students will have obtained the knowledge to effectively deploy and support their Application Jukebox infrastructure and deployment. To view the course description, please locate the Course Description Catalog.

Delivery Options:

Blackhawk Technology Consulting LLC Application Jukebox Training/Professional Services have developed four levels of training and based on the businesses needs, either or all methods may be utilized.

Live Online Training:

With our live online training, you can attend from the comfort of your home or office. Online courses feature all of the benefits of the on-site instructor lead training without requiring any travel. All online courses include hands-on lab excersises, all that you need is a computer.

On-site Training:

With our on-site training, you can enjoy all of the benefits of our certified instructor lead classes without having to travel, because it takes place on your companies location.

Blackhawk Hosted Training:

With our Blackhawk Hosted Training, your business can take advantage of our test lab environment and our facilities to conduct the training. Seating for this training is limited to 6 to 8 people and requires a month-in-advance booking.

Self-paced Training:

With our self-paced training, you have the ability to learn when and where you want. This is especially helpful for students that cannot get away from work or are too busy to attend the online training. All that you need is a web browser and Internet access.

For more information about our training delivery methods, please download our Blackhawk Application Jukebox Training/Professional Services packet from our Blackhawk and Endeavors Application Streaming/Virtualization Solution page and/or please feel free to contact our sales team at sales@blackhawk-tech.net or 541-505-7229.
