Blackhawk Technology Consulting LLC

Blackhawk and Endeavors Application Streaming/Virtualization Solution

Application Packaging Feasibility Study

Overview:

This consulting program which is offered by Blackhawk Technology Consulting LLC is designed to help your business maximize your businesses valuable time and resources by helping you quickly understand if your Windows-based custom application can successfully be packaged with Application Jukebox Packaging Studio. Endeavors and Blackhawk Technology Consulting LLC maintain a list of supported and approved applications where customers and partners have reported a successful Application Jukebox application packaging experience for their applications.

If it is determined that your Windows-based custom package is not on the list of approved applications, then a Blackhawk Application Jukebox Application Packaging Feasibility Study will quickly determine if it is technically possible to package up the application using the Application Jukebox Packaging Studio. However, if it is not immediately possible to package your Windows-based custom application, then it will be determined what steps must be taken to successfully package your Windows-based custom application.

By taking full advantage of the experience and expertise of the consultants of Blackhawk Technology Consulting LLC, your business will be able to receive a quick and reliable answer.
