

Blackhawk Technology Consulting LLC Services

Blackhawk Assessment and Planning Data Sheet

Blackhawk Technology Consulting LLC's services offerings are designed to help your IT organization at any IT life-cycle or stage; from gathering business and technical requirements and specifications, to custom development, all the way through the integration cycle with existing business systems and processes. The Blackhawk Assessment and Planning service offering is detailed below.

Blackhawk Assessment and Planning:

This comprehensive service, delivered by our experienced consultants, provides clients with an in-depth and thorough assessment of their current IT environment, including policies and procedures. We take a holistic approach and take into consideration IT infrastructure, data, storage, server, clients, security appliances, data center security, applications and application optimization, business continuity, operations, virtualization technologies, and support. Next, we provide a detailed plan that supports your IT goals – goals that in turn, support the overall success of your business and related objectives.

Blackhawk Assessment and Planning Program

Pre-program Teleconference Call

- Introduce the key participants of the project (Blackhawk consultants, business IT staff, decision makers, etc.)
- Verify hardware and software specifications for the proposed project
- Review of the businesses information resources policies and procedures
- Review the assessment and planning schedule for the project
- Review the logistics of the project

Day 1: Onsite

- Blackhawk Assessment and Planning start meeting
- Virtualization overview (PowerPoint presentation and handouts)
- Specific virtualization solution technical architecture
- Specific virtualization solution installation and configuration (demonstrated with a virtual lab environment)
- Proof of concept: Virtualization solution demonstration and management (demonstrated in a virtual lab environment)

Day 2: Onsite

- Department and user specific interviews and surveys
- Asset and inventory of existing infrastructure
- Inventory of department and business specific applications
- Inventory of data and storage procedures

Day 3: Onsite

- Creation of a virtual test lab of the existing infrastructure and environment
- Detailed walkthrough of the new proposed virtual environment
- Detailed assessment and plan of the proposed project (complete with maps, documentation, analysis and cost-breakdown of the project)
- Wrap up and next steps

Follow-up phase

- Questions and issues with the project
- Finalized detail plan and cost-breakdown
- Deployment and next steps

Blackhawk Technology Consulting LLC is unique in that its technology professionals have proven expertise and capabilities in virtualization technologies, from planning, designing, deploying, and supporting organizations using virtualization technologies so that businesses can remain productive and profitable.
