

Blackhawk Technology Consulting LLC Services

Blackhawk Quick-start

Blackhawk Technology Consulting LLC's services offerings are designed to help your IT organization at any IT life-cycle or stage; from gathering business and technical requirements and specifications, to custom development, all the way through the integration cycle with existing business systems and processes. The Blackhawk Quick-Start service is outlined below.

Blackhawk Quick-start:

This packaged solution gets your organization up and running with the "right" virtual technology, quickly and effectively. Blackhawk consultants will work with you to install and configure any of the above mentioned technologies. We can then teach you how to take full advantage of each technology, or we can provide you with on going support.

Blackhawk Quick-start Program

Pre-program Teleconference Call

- Introduce the key participants of the project (Blackhawk consultants, business IT staff, decision makers, etc.)
- Verify hardware and software requirements and specifications
- Review the Blackhawk Quick-start schedule and scope of project
- Review the logistics of the project

Day 1: Onsite

- Blackhawk Quick-start game day meeting

- Specific virtualization solution overview (PowerPoint presentation and handouts)
- Specific virtualization solution technical architecture
- Proof of concept: specific virtualization solution setup (real-world lab environment)

Day 2: Onsite

- Using the specific virtualization solution training (for example, server virtualization: VMware, Microsoft Virtual Server or Virtual Iron)
- Proof of Concept: Virtualization deployment and management training (for example, how to install, deploy and manage Virtual Iron)
- Specific virtualization solution operations training
- Wrap up and next steps

Follow-up Phase

- Questions and issues with the project
- Deployment next steps

Blackhawk Technology Consulting LLC is unique in that its technology professionals have proven expertise and capabilities in virtualization technologies, from planning, designing, deploying, and supporting organizations using virtualization technologies so that businesses can remain productive and profitable.

Key Benefits

- Take advantage of Blackhawk Technology Consulting LLC's extensive and reliable virtualization industry and product expertise and experience for an in-depth and reliable virtualization solution quick-start solution
- Get your virtualization solution up and running quickly
- Ensure a successful virtualization solution deployment

Blackhawk Quick-start Overview

This service from Blackhawk Technology Consulting LLC is designed to help your business take advantage of your precious time and IT resources by helping and guiding your business to quickly understand and make use of the capabilities of server virtualization, storage virtualization, application virtualization, OS and application streaming technologies. By installing and configuring your businesses specific virtualization solution, whether it is VMware or Virtual Iron for server virtualization or Thinstall or Altiris's SVS for application virtualization, your business will obtain the full knowledge of the specific product and the assurance that your IT staff can effectively administer your virtualization solution. By taking full advantage of Blackhawk Technology Consulting LLC's experienced consultants, your IT staff and your business will successfully be able to deploy your specific virtualization solution quickly and efficiently.

Blackhawk Quick-start Objectives

- Setup, install, configure, and run your specific virtualization solution for your particular environment
- Provide your IT staff with working virtual solutions (virtual machines, virtualized applications and virtualized OSs) for testing purposes
- Deliver to your IT staff a working proof of concept tutorial with their own virtual test lab
 - Installation and configuration of your specific virtualization solution (for example, installation of Virtual Iron or Thinstall)
 - Virtualization solution creation and management (for example, the creation of a virtual machine and a creation of a virtualized application)
 - Provide your business with a consultation session regarding the specific requirements and cost considerations for integrating your specific virtualization solution
 - Development, document and implement best-practices for your specific virtualization solution

Blackhawk Technology Consulting LLC's Roles and Responsibilities

- Blackhawk Technology Consulting LLC Senior Consultant: Conducts the Quick-start session and training
- Blackhawk Technology Consulting LLC Project Manager: Plans and coordinates all project functions involving the use of the specific

virtualization solution use, including: server provisioning, application provisioning, and management

Business ITS Staff Roles and Responsibilities

- System Administrator: Responsible for all hardware and networking and the ability to address hardware and networking issues and resolve them accordingly
- Server Administrator: Responsible for managing the server systems
- (both virtual and physical)
